Dr. Wenjing (Angela) Zhang

Department of Energy Conversion and Storage
Technical University of Denmark
Research interests: electrospun nanofibers, high temperature proton exchange membrane fuel cells
Resume

Dr. Wenjing (Angela) Zhang is a Scientist at the Department of Energy Conversion and Storage at Technical University of Denmark (DTU). She received her PhD from Hong Kong University of Science and Technology in 2009. Prior to joining DTU, she was a Research Associate at Vanderbilt University (USA) working for Prof. Pintauro for 3 years. She is currently managing electrospinning activities in several projects, including electrospun nanofibers for bio-gas upgrading and storage for high temperature proton exchange membrane fuel cells and for solid oxide fuel cells.
