

## Dr. Denis ROIZARD

	<p>Laboratory of Reactions and Process Engineering CNRS-University of Lorraine, France <b>Research interest:</b> separation of liquid, gas and vapors - Innovative polymer synthesis and membrane preparations</p>
---	--

Denis ROIZARD is Director of research at French National Center for Research, CNRS-University of Lorraine. He is involved in polymeric design of membranes and membrane technologies for gas, vapour and liquid separations – Study of hybrid processes - Application to chemical process industries and Coordinator of carbon capture research projects with a focus on membrane based gas/liquid contactors. He has published over 100 papers in peer-review papers, 25 PhD theses.
